### Captured Responses

Field	Response
Incident Date	2026-02-22
Dog Name	—
Staff Member	Test
Incident Type	Behavior
Incident Description	This is a very long incident description intended to validate wrapping behavior in the generated PDF output. The text should wrap to multiple lines within the response cell and not overflow outside the page margins. Additional details: dog became reactive near doorway, de-escalation protocol followed, no injuries, resumed normal behavior after separation.
Action Taken	Staff separated dog from stimulus, performed calming protocol, documented event, informed supervisor and owner, and monitored for 30 minutes. This sentence is intentionally long to force wrap in PDF table cells.
Resolution/Follow-up	No injuries. Follow-up training and gradual reintroduction planned.
